APPLICATIONS

LEDGESTONE & DRYSTACK

Perma building stone comes out in a nice blocky form for easy installation with very little waste. Mix and match your sizes to give a look that fits your preference whether formal or rustic. The building stone can be used in drystack or veneer walls, fireplaces and edging.

BOULDERS & SLABS

The Perma product line makes beautiful boulders and slabs that are clean and naturally cut to fit any landscape or architectural project. The slabs can be used as natural steps or waterfalls spillways. Boulders can be special-ordered from the quarry in dimensions ranging from 2' to 12' across.

MONTANA BUILDINGSTONE

Murase Associates

MONTANA BUILDINGSTONE
LANDSCAPE ♦ ART ♦ WALLS ♦ BENCHES ♦ STEPS

Our Montana Buildingstone product lines are as diverse as the state they come from. The colors include vibrant reds, oranges, browns and earthy grey tones that blend perfectly with most landscapes. The rustic look and diverse product line makes this product a perfect for an array of applications.

COLOR, TEXTURE & APPLICATIONS

PERMA LEDGE

The Montana Buildingstone's tendency is to be consistently smooth with cleaner edges and blockier dimensions. It comes out of the ground ready to use. When a sealer is applied, the colors come alive to give you a unique Montana experience. With the quarry's new saw and guillotine, this stone can be shaped and processed to meet most designs.
